Deborah Inskip (Absent)  
Svetlana Khaiboullina (Absent)  
Nancy Eklof, Executive Director BHME

#### MINUTES

May 30, 2012 Technology Committee Meeting

Members of the public: Dr. Dan Royal (Telephone)

1. Dr. Bob called the meeting to order/roll call (5:30 pm)
2. There were no visitors
3. Approval of today's agenda/Determination of quorum  
Motion: Dr. Devlin made motion  
Second: Dr. Eslinger  
Motion: Passed
4. Dr. James Forsythe proposed protocol presented at the Annual Board meeting February 4, 2012 and the previous Technology Committee meeting to allow autologous "Stem Cell" Therapy  
Discussion: The therapy is allowed under current statute NRS 630A.020 which defines the use of Sarcodes in Macro doses called "Cell Therapy". The committee, based on the NRS and NAC determined that the procedure is legal

5. Dr. Dan Royal Protocol (provided to the committee for review) was a similar procedure and or protocol proposed by DR. Forsythe.

Dr. Devlin suggested when treating patience with the procedure(s) a Consent Form should be signed by the patient detailing the procedure(s) and the expectations. Further the issue of the blood being transported out of state was considered not acceptable ...as the “less you do with the blood the better when extracting from the patient,” Dr. Royal stated.

The Committee further discussed creating an outline of what is allowed within the statute including a formal consent from the patient under treatment. Based on the outline, the Board would create a Policy regarding the use of Sarcodes in Macro doses ...Stem Cell Therapy. The outline would then be presented to the full board for Discussion and Possible Action.

Dr. Devlin made the above motion to develop an Outline of Allowed Procedures (within the confines of the law) based on the two protocols discussed with the intent of presenting to the Board. Dr. Eslinger seconded and the motion passed.

The motion was made to adjourn the meeting at 5:46 pm by Dr. Eslinger, seconded by Dr. Lee. A future meeting date was not set.
