

NVBHME Board Meeting_11-30-2023_

Mon, Apr 08, 2024 5:58PM 1:46:04

SUMMARY KEYWORDS

board, homeopathy, charles, homeopathic, reciprocity, work, motion, good, unmute, people, years, move, meeting, applicants, nevada, hmd, fees, approve, hear, discussion

SPEAKERS

Phillp Zinni DO, Carrie, Greg Olson APH, Dr. Fnu Dhaani, Carrie Porter, Abbira, Melvin Nario MD HMD, Dr. Greg Olson, Charles Green, MelvIn Nario MD HMD, John Glavinich MD HMD, Karen Dickerson, Mr. Feely, Frank Shallenberger MD HMD, Bruce Fong DO HMD, Erlene Forsythe

Charles Green

Perfect now we're going yeah, I apologize for that.

Bruce Fong DO HMD 03:20

I'm sorry, I don't mean to interrupt your brother. No,

Charles Green

no, no you we got to do this properly and you're the old hand at this. So I appreciate your comments, thank you verify that this meeting is good. It's verified that the meeting is being recorded. So that's good. All right, so we'll just start over I apologize again. So now this is the Nevada board of homeopathic medical examiners. We're going to start with our five inductees. So by Charles Green as secretary treasurer, the Nevada board of homeopathic medical examiners, a test receiving from the Office of the Governor of the state of Nevada, the following five inductee board member appointments. I'll call rule.

Charles Green

Karen Dickerson

 Karen Dickerson 04:06
Present.

 Charles Green
Bruce Fong.

 Bruce Fong DO HMD 04:09
Here

 Charles Green 04:10

 Greg Olson APH 04:14
Present

 Charles Green
Frank Shallenberger

 Frank Shallenberger MD HMD 04:16
here

 Charles Green
Alright so we have a quorum of five Inductees Now, I will read the oath of office, I will say Aye.
And then you you say your name and then I will read the oath. So I

Frank Shallenberger MD HMD 04:31

I Bruce Fong, Melvin Nario, Greg Olson, Frank Shallenberger and Karen Dickerson

Charles Green

Do solemnly swear and affirm that I will support protect and defend the Constitution and the government of the United States and the Constitution and state government of the state of Nevada, against all enemies, whether domestic or foreign, and then I will bear true faith and allegiance and loyalty to the same. Any ordinance, resolution of law or any state notwithstanding that I will faithfully, perform all the duties of the office of homeopathic Medical Examiner, on which I am about you enter the oath. So help me God. Under the penalties, pains and surgeries, under the pains and penalty of perjury, I, I state your name do solemnly swear to affirm that I will legally that I am legally qualified to serve as the member of the Board of homeopathic medical examiners. And then I will faithfully perform all of the duties of the member of the Board of which I am about to enter. So help me God under the pains and penalties of perjury. So, welcome. Welcome to the board. We now have six members. So this is a this is a first for our board in four years. So this is wonderful. So hopefully we can move this board forward and do a lot of good things for it. That's the the objective here. So now we're all members. So let me get the second portion of it here. Okay, now we'll do a roll call and to determine if we have a quorum. So again, I'll state your names and you attest that you're here. Here in Dickerson

Charles Green

Bruce Fong

Bruce Fong DO HMD 06:18

Here

Karen Dickerson 06:18

here.

Charles Green

Melvin Nario.

Melvin Nario MD HMD 06:20

Present

Charles Green
Greg Olson,

Melvin Nario MD HMD 06:22
here

Charles Green
Frank Shallenberger.

Frank Shallenberger MD HMD 06:25
Present

Charles Green
Charles Green, I'm present. Now that's the roll call for a quorum. We have a quorum. Okay, so moving on to Item three, which is a motion to approve the agenda.

Charles Green
So do I hear eyes or N

Bruce Fong DO HMD 06:46
Sir? Mr. Chairman, I would say that you need a motion to approve the agenda and have a second vote.

Greg Olson APH 06:51
I make I'll make a motion that we approve the agenda.

Bruce Fong DO HMD 06:55
I second it.

Charles Green

Charles Green

So approved. Now we move on to the election of the board of officers.

Bruce Fong DO HMD 07:04

ever vote? Yeah. Yeah.

Charles Green

Oh, excuse me.

Bruce Fong DO HMD 07:07

I'm pushing second than a vote and then

Charles Green

help me out here. So

Mr. Feely 07:14

Charles, to say All in favor of approving the agenda.

Charles Green

All in favor of approving the agenda. say aye. Aye. Aye. We have approval of the agenda. Now we'll move on to Item four, which is the election to the board officers. We're going to elect a board president, board vice president and a board secretary treasurer. So I nominate Bruce Fong for president of our board.

Bruce Fong DO HMD 07:44

If we're under Robert's Rules of Order, you cannot make a nomination. You're the chairman currently. You're chairing the meeting, you can't make a nomination. So you ask for nominations from from the board members. I'm sorry. Good,

Charles Green

sir. I asked for nominations for our board president.

Charles Green

Greg Olson APH 08:01

I nominate Bruce Fung is president. We have a nomination.

Charles Green

Do I hear a second?

Greg Olson APH 08:08

I like Bruce.

Frank Shallenberger MD HMD 08:13

I'll second.

Frank Shallenberger MD HMD 08:14

All right. So we have a nomination and a second. So. So I guess he's duly elected as our president of our board.

Bruce Fong DO HMD 08:24

Take a vote. Yeah.

Charles Green

I asked if there's any more nominations. Charles, is there any more nominations for President? You're in it.

Bruce Fong DO HMD 08:41

So I would I would call for the vote now. Now.

Charles Green

I will call for the vote for the president. The board of homeopathic medical examiners. Do I hear an aye aye or nay? So done. All in favor? Now? I guess you're the Board President. Mr. Fong?

Charles Green

Great

Great.

B

Bruce Fong DO HMD 08:59

Thank you. Okay. Do you want it good? Do you want to hand it to me? Do you want do you want to keep running me, Charles. It's all up to

Charles Green

you. Well, obviously, I'm not very good at this. So I'm going to turn it over to you now that you're a board president. Okay. All right. So I'll get better at it. But that's okay.

B

Bruce Fong DO HMD 09:20

Just for the record. This is Bruce Fong. This is actually a Coke Zero. That is not anything alcoholic. Just make sure nobody thinks I'm doing that. Oh, it's a homeopathic board. Okay, that's a homeopathic Coke Zero. I don't know how else to say it. Okay, I think we're good. All right. I guess we're moving on to Agenda Item number three. Well, I guess that is a gentleman three up. So gentlemen, four Section Two we need to elect the Vice President. I'm opening the floor for nominations for the vice president of the Nevada board of Homeopathy.

Charles Green

I nominate Melvin Nario

B

Bruce Fong DO HMD 09:59

nomination Dr. Melvin Naria. Do I have a second on the floor?

F

Frank Shallenberger MD HMD 10:04

I'll second.

B

Bruce Fong DO HMD 10:05

We have a second. Dr. Shallenberger. Any additional nominations for the the officer vice president? Like once or twice? not hearing any. All in favor? Oh, sorry. Is there any discussion about Dr. Naria?

D

Dr. Greg Olson 10:24

Seeing none, let's call the vote. All in favor? A Dr. Melvin Nario becoming the vice president for this year of the homeopathic board, please signify by saying yes. All

this year of the homeopathic board, please signify by saying aye. Aye.

D Dr. Greg Olson 10:37

All right. Any opposed say nay? Melvin. Either congratulations, or I'm sorry, whatever you want to take your guys relations.

M Melvin Nario MD HMD 10:47

Thank you. All

B Bruce Fong DO HMD 10:49

right. Now we have the the office of the board secretary treasurer, who currently is Charles Green. Do I have a nomination for either a reaffirmation document, Mr. Green, or do we have any other nominations on floor?

F Frank Shallenberger MD HMD 11:04

Y'all nominate Charles.

B Bruce Fong DO HMD 11:06

All right

G Greg Olson APH 11:06

I second it

B Bruce Fong DO HMD 11:06

We have a second. And we have a second for Charles. Any additional nominations? Well, once, twice, no, go. Okay. Any discussions necessary? Seeing none, I'll call for the vote. All in favor of Mr. Charles Green continuing on as secretary treasurer of the Nevada board of homeopathy, please signify by saying aye.

F Frank Shallenberger MD HMD 11:30

Aye.

G Greg Olson APH 11:33

Greg Olson APH 11:32

Aye

Karen Dickerson 11:32

Aye

Melvin Nario MD HMD 11:32

Aye

Bruce Fong DO HMD 11:32

Any opposed say nay? Seeing that, that's unanimous. Charles, congratulations. You are now the secretary treasurer reaffirmed?

Charles Green

Thank you.

Bruce Fong DO HMD 11:43

Okay. As we start all meetings, we have a section for public comment. Is there anybody in the public? In this meeting right now that would like to comment? Is John, are you trying to comment? Charles, I think you have to unmute John.

Charles Green

Well, if I have to ask to unmute. I hit the button. You're still muted. John, can you hit it on your end? Yeah,

Carrie Porter 12:11

I think Am I on now? Yeah, you're okay, I just wanted to comment, the Charles has done a really great job with the board auditing correcting issues, getting the books in order and functioning with the with the state agencies. And one of the things that he and I are working on, we're starting an integrative Medical Foundation for the state of Nevada, which, you know, we're going to do a 501 C three, by the end of the year, we've already talked to the lady that handles that. And we figured out a way to get it done quickly. And at a very good price, you know about half price. And I've also commandeered about 200 pages of documents, that kind of our the blueprint to do this. So we're going to be able to do it pretty quick. We just have to tailor it to our needs. So I think our goal is to raise, have a fundraiser probably in March. And we're going

to try to, you know, help finance the board. I know Bruce is owed some money. I know Charles has been working for free for the last two years. And you know, he's encountered a lot of expenses. And then we're also, you know, I know, we're working on trying to get rid of the prior bills that from the Attorney General etc. And I think there's a chance that could be waived, too. So we're working on all kinds of different things on the side. And I have some other things. Maybe I could talk to Bruce in private and rather than bring it up in the meeting, but

 Bruce Fong DO HMD 13:50
Oh, give me a call bud, no anytime.

 John Glavinich MD HMD 13:54
Yeah, no problems. And also wanted to announce one thing, we just got funding today for our clinic. So money in in three weeks. So hey, Charles,

 Bruce Fong DO HMD 14:08
I just got a text message that there's some people that want to say something, but you need to unmute them. All of them

 Charles Green
came on me. Let me do that. Okay. Dr. Forsyth, I tried to unmute you.

 Frank Shallenberger MD HMD 14:20
Dr. comparators. I would remind

 Bruce Fong DO HMD 14:23
you that public comment we have to listen we cannot respond or say anything. That's just one of the rules of the meeting here. Okay.

 Charles Green
And we'll be okay, I think I'm muted. Earlene did. Carrie Porter. Let me unmute her. And

 Bruce Fong DO HMD 14:53
then also there's one that says Dr. James Forsyth, it looks I

Charles Green

clicked on that button doesn't seem to want to work. game.

B

Bruce Fong DO HMD 15:01

You got you guys have to unmute from your end too. Yeah.

E

Erlene Forsythe 15:05

All right, can mute. Unmute. Okay.

B

Bruce Fong DO HMD 15:09

And then Carrie, you have to be perfect. We're just anyway, again, the floor currently is open to any public comment. So please go ahead and anybody wants to pipe in, please go ahead. And let me just specifically call out, Carrie, you haven't unmuted yet. But if you need to, let's go ahead and say something or turn on your video or something less than that. Well, there you go. Carrie, did you have any public comment?

C

Carrie 15:43

I do not. I attended Dr. Fong. Listen to see who the nominees were actually didn't realize, my thought. One of the nominees, so Congratulations, Dr. Nario.

B

Bruce Fong DO HMD 15:57

All right. All right. Seeing that there's no other public comments, we will move on. The item number six. Item number six is the Secretary Treasurer's Report. So, Mr. Green, would you go

Charles Green

ahead and so okay, yes, yeah, we're kind of at the end of the year, and we're in pretty good shape. We've got \$34,641 in the bank as, as of today, I checked the account in the month of December. Excuse me.

K

Karen Dickerson 16:28

Can you hear me? Okay.

—

Charles Green

Okay, the month of December is our collection period. And whereas we're estimating somewhere. Somebody asked me a question. Okay. So that that'll include another 28,000. By January one we should have on hand about 63,000.

Bruce Fong DO HMD 17:00

were you guys able to hear that? Somebody's board members, we only really heard the numbers there. I know. There's some back. Okay, we're good. All right. Charles, anything else?

Charles Green

There's the report.

Charles Green

Well, no, that's the that's the that's the current financial situation. I've got reports to submit to some governmental bodies next year that I will be doing for us.

Bruce Fong DO HMD 17:23

Well, yes, mute your mics, your conversations. There. I'm sorry. You guys are actually we can hear all your stuff. I'm sorry. There's a little button on the left side, bottom, it says Mute. Mute and that

Bruce Fong DO HMD 17:56

Sorry, guys. I love you. Here. So I'm sorry, Charles please continue.

Charles Green

Okay so So if we have to have a mandatory meeting sometime in January, and I'll give another status report of our board financial position. So I guess we can move on now. In review and consider the new HMD licensing and APA certificates of the of the applicants that are present. They are both present as I can see.

Bruce Fong DO HMD 18:38

Charles once you go ahead and introduce our applicants to us, and then individually, and then I will open the floor for comments and any kind of questions that we need to work with.

Charles Green

Okay.

Frank Shallenberger MD HMD 18:49

Hey, Bruce, do we need to accept the report? Charles report? We need to do that.

Bruce Fong DO HMD 18:58

Oh, thank you. That's actually a good that's a good comment. Dad, can I have a motion to accept the secretary Treasurer's Report?

Frank Shallenberger MD HMD 19:04

I so motion Okay.

Greg Olson APH 19:08

I'll seconded it

Bruce Fong DO HMD 19:09

a second by Dr. Olson. Any discussion on this? Seeing none, let's call it all in favor accepting the secretary Treasurer's Report, please indicate by saying aye.

Bruce Fong DO HMD 19:20

Aye.

Frank Shallenberger MD HMD 19:20

Aye

Greg Olson APH 19:20

Aye

Melvin Nario MD HMD 19:20

Aye

 Karen Dickerson 19:20
Aye

 Bruce Fong DO HMD 19:21
So all your mouths move. So I assume there's no Nays. Okay, so the motion carries. We accept the secretary Treasurer's Report. We will now move on to the interview of the applicants. And as Charles treasurer, you have the duty to to introduce everybody.

 Charles Green
And rightfully so here. I want to introduce Dr. Philip Zini. He's a DO. He's been in medicine for several years. It is an outstanding physician as I can see from his information here and I did put all this information in your packet. So you should have that in there to review And I'll let he's he served in the Chicago College of Osteopathic Medicine. He's got a tremendous background. And I think he's largely a Doctor of Osteopathic, and I'll let him go ahead and give us a little background on him himself. Okay, so let me get him here. I'll hit the ask to unmute. And you can turn on your microphones. Perfect. Okay, they're good. Thanks. Thanks, Mohan. That's wonderful. Thanks

 Phillp Zinni DO 20:37
for doing that. So, briefly, because I've been doing this for over three decades. My whole background is primary care. I have a fellowship in sports medicine, and certificates from various organizations in functional medicine, age management, medicine. So now to kind of round out everything, especially after the viral incident, I don't know what I'm allowed to say or not say on this forum. But after we had the recent viral incident, I got more interested in homeopathic medicine and how we can treat people better. And give them more alternatives to treating them. So with that background, I would love to join this esteemed group.

 Bruce Fong DO HMD 21:32
So both is present. And the fact that I'm helping to train Dr. Xin he serves on those hours under me, I'm going to have to exempt myself from a vote. But I also would add, would ask a favor the Board of Doctor Zinni has not had a chance to actually take his exam yet. But what I'd like to do to expedite him becoming an HMD is have our interview with him tonight to ask any questions. And to conditionally approve him as long as he takes the exam. And so I'm going to tell you this guy is and not only is he one of my, better friends, but he and I have worked together in Nevada osteopathic for a very long time. And Phil has been there for us, he's always been there so knowledgeable. He's done a lot of sports medicine, lectures, and he's always been able to kind of sneak in something from the functional or the integrative side. And that I've always admired that about Phil. And Phil is probably one of the most upstanding guys, you can ever be around. He's always there for everybody else. I mean, I know one point when I was

sick, he was actually no offense, you bothered the hell out of me when I was sick, but you made sure I was okay every day. But the bottom line is, I can't tell you from a character standpoint, and from a knowledge standpoint, there's anybody more eminently qualified than Dr. Zinni to become an HMD. So I would ask from the floor, if we could have a nomination to conditionally approve him after it might have a chance to obviously interview but to conditionally approve it, as long as he passes the exam.

F

Frank Shallenberger MD HMD 23:07

That's a great, great discussion on that, Bruce, of what I wanted to ask you, Phil is, are you located in Reno?

P

Phillp Zinni DO 23:17

Technically sparks so, close enough.

F

Frank Shallenberger MD HMD 23:23

Good to have you with us, man. You sound like just the kind of guy we need.

P

Phillp Zinni DO 23:26

Thank you. Thank you.

M

Melvin Nario MD HMD 23:28

I also had the chance to meet up in Dr. Phil Zinni here. And he was in the clinic. And again, it was a pleasure talking to you. And definitely, you're going to be a great asset to the group. Thank you.

Charles Green

I believe so as well. His he sent me just a mountain of beautiful paperwork, this man is very, very accomplished. I have to tell you that. And he is a welcomed addition to our homeopathic challenges here. So I'm thoroughly impressed with your background, sir.

P

Phillp Zinni DO 24:00

Bless you.

B

Bruce Fong DO HMD 24:03

So, I have a motion that we approve Dr. Zinni to the licensure of HMD as long as he passes the test. So I mean, maybe you can just say, Okay, so, so moved by Dr. Shallenberger. Can I have a second? Second? Second by Dr. Olson, any further discussion? Not seeing any I will call for the vote all in favor of approving Dr. Zinni to the office or to the appointment of a homeopathic medical doctor upon successful completion of the written exam, please indicate by saying Aye.

F Frank Shallenberger MD HMD 24:38
Aye

G Greg Olson APH 24:38
Aye

K Karen Dickerson 24:38
Aye

M Melvin Nario MD HMD 24:38
Aye

B Bruce Fong DO HMD 24:41
Any opposed? Congratulations, still. Let's get you through that test. And you're welcome aboard conditionally.

P Phillip Zinni DO 24:47
Thank you. Bless you all.

B Bruce Fong DO HMD 24:50
Let's see. Mr. Green, would you introduce our next candidate please? Okay, we

Charles Green

We have an APH candidate. This to talk about impressive. This gal is, is I'm going to see her as my homeopath. I can tell you that her background is phenomenal. I'm going to probably butcher her name here a little bit. But the Fnu Dhaani she has a doctorate in homeopathy. She

has a medical doctorate degrees. Well, She hails from India, but I'm going to let her do it. Dr. Dhaani let me have you unmute and give us a little bit of background on yourself.

D

Dr. Fnu Dhaani 25:30

And thank you, Mr. Charles for introducing me. I feel immensely honored to introduce myself to everybody, those who are on the board and attending this meeting. Briefly, I will say I'm a, my name is Fnu Dhaani, and I'm a medical trained, licensed doctor in India. With more than six years of experience in homeopathic medicine. I learned a lot of things. I learned a lot of things about homeopathy and holistic medicine. And with this dedication, I came to United States in January 2021, to continue my education and pursue my Master's Degree in Public Health from the University of New Haven. And I continue to working because I my liking for health advocacy and community work is it is engraved in me. So this is some my experience as well as my academy background. Currently, I'm also continuing my homeopathic knowledge to the future homeopathic champions as a part time teacher at American College of homeopathy, where I'm teaching homeopathic Materia Medica. And this semester, and from the next semester, I'm going to teach a repertory homeopathic repertory and clinical supervision classes. So, and I would be very honored if I get the chance to present or to start my practice as an APH. In Nevada.

B

Bruce Fong DO HMD 27:13

Doctor, it's a done in my career, I understand that your entire career has been with homeopathic and integrative medicine. Yes. All right. Mr. Green, would you recite the governor's Edik to us about reciprocity.

Charles Green

Okay. 003 and 004. I wrote extensively about it to the governor and 003 with reciprocity is that he's looking for professionals like her and like others, visa vie that people that have been in the profession for a long, long time that really understand the profession. He says that we can we can waive their some of the requirements as far as testing because they're a gal like this, that says has taught for five years. In fact, we're a recruiter to help us modernize our questions and things in the future if she would so choose to help us out. So so we are allowed to as far as our governor to bring on qualified individuals with very intensity backgrounds, and reciprocity.

B

Bruce Fong DO HMD 28:20

Okay, board members to officially do this right, according to Robert's Rules, I need a motion to approve Dr. Dhaani to be in APH by reciprocity, and then we need to discuss that. So can I have a motion for that place?

F

Frank Shallenberger MD HMD 28:36

So moved.

 Greg Olson APH 28:37
Okay. Thank you, Dr. Shallenberger.

 Bruce Fong DO HMD 28:39
Do I have a second?

 Bruce Fong DO HMD 28:41
Thank you, Dr. Nario, the floor is open for discussion we have to decide tonight, do we we have a new avenue to more rapidly integrate members into our community. And as Mr. Green has already stated, there's a governor's edit that will allow us to do by reciprocity what we previously had to have somebody do a written exam for if somebody has, I believe, Mr. Green, you said more than 20 years of experience, specifically in Homeopathics.

 Melvin Nario MD HMD 28:41
Second.

 Charles Green
It really does not like 20 years is knowledge of the profession. So you know, whether they're just a leader leader in their field, they've taken all the tests over the years, and they've got a degree, you know, this woman is essentially degreed in the industry and homeopathy that we're so entitled to, to practice here is dual dual medicine, physicians.

 Bruce Fong DO HMD 29:33
So again, Dr. Dhaani, you had experience for about 20 years is what I meant. My understanding is yes, okay, she's nodding, I'm sorry. So Board Members, we are in uncharted territory. I'm warning you guys, we need to actually take a really careful look at this. Because once when we vote on Dr. Dhaani comes through, it's going to become a precedent. You guys understand what that means? Okay. So another means one as we do this, it means everybody else is in this position. We have to approve them.

 Charles Green
We have AG weigh in on this, please. Yeah,

 Bruce Fong DO HMD 30:07

 Bruce Fong DO HMD 30:07
Mr. Feeley, please. Yeah. Okay. So

 Bruce Fong DO HMD 30:11
just looking at the statutes, it seems there's already something in place that would provide for what 630A . 70 applicant for license was graduate afford medical school? Isn't that generally what this applicant here would or should qualify under? I personally don't know anything about this, this edict from the governor. So I guess I need a little more information on any special reciprocity rules that that I haven't been informed of at least.

 Charles Green
So if I may It's in the packet that I provided all the members, so it can be reviewed there as well.

 Bruce Fong DO HMD 30:51
Okay. So just thought of precedents for everybody's understanding the homeopathic board has traditionally asked, even with somebody with such impressive credentials to go ahead and take a written exam, my understanding from the Governor's addict is that this allows us that, by our choice, by our judgement of an individual, that we feel that they're eminently qualified that taking the exam would just be unnecessary, that we could potentially use this edit now to allow, Dr. Dhaani does not have to take the exam simply approver through reciprocity at this point,

 Greg Olson APH 31:28
I have a question about reciprocity, their does that mean that as an APH, she will not have a supervising physician, she'll just be able to practice? Not at all. So all the same rules apply her? Okay.

 Charles Green
In fact, I think we're gonna correct me if I'm wrong. Your supervising physician will be Dr. Pfau. Is that correct? Yeah, so she's applied with Dr. Pfau?

 Frank Shallenberger MD HMD 31:55
I would think it would be good if the board established some criteria for reciprocity. I think the reciprocity idea is fantastic. I'm going to talk to you a little bit later about doing this with naturopaths. But I think this ID is, is in many ways the future of the board. But it makes sense to me to establish some criteria for that. So that we don't do like Bruce is talking about open the door to precedents that could trouble us down the line legally? Yes,

Charles Green

yes. Good comment.

Bruce Fong DO HMD 32:35

Floor is open Anybody have any ideas? Should we say?

Charles Green

Well, I'd like to hear a little bit more from her about her thought process. On this in realm give us a little bit more of your background, if you could, so that we could have a little deeper understanding of you as a homeopath. So, Dr. Dhaani, I'll need you to unmute to talk with us. He's muted. You're muted.

Bruce Fong DO HMD 33:04

Would you mind muting your mic? And tell us a little bit more about yourself?

Dr. Fnu Dhaani 33:11

Thank you so much. Am I audible? You can hear you now. Okay. Thank you so much, Mr. Charles and everyone for considering my candidature. I just, I really want to share my like full background. I passed my doctor of medicine and bachelors in homeopathic medicine and surgery in India. After that, I took up one year Postgraduate Diploma in forensic sciences, out of curiosity to learn more about medical jurisprudence, and as well as the toxicology, and how it is bridged with homeopathy. Because when I was in my second year of medical school, I had, like, I was inclined towards the toxicology and homeopathy can work in that. So I got the opportunity to understand that field. And in the meantime, I was also working with different organizations, specifically targeting the cancer. And we were actually practicing homeopathy to the patient, those who are coming with a high risk of cancer as well. And after my all, it more than six to seven years of experience, under many doctors, by myself, and I used to run two Classical Homeopathy clinics, which, where I continued to provide my Compassionate treatment to all my clients. And but I was a little bit unsatisfied with myself, because I wanted to move out from my four walls to work for the community because I feel very close intent when, when I was doing that, because I want to reach out to everyone, and specifically, educating them about the homeopathy and its efficacy. So I decided to move out from my comfort zone from India, and came here to continue my education by doing a master's in public health from University of New Haven, which eventually opened my door to work for the government, public health department where I worked as a public health educator to promote education, and as well as community health. So that really helped me to open my mind to work with different public health champions, different public health advocates. And there I learned about how the society work, how community are thriving for a proper health care system. And then eventually, I got an opportunity to continue my education and continue my work

experience as a homeopath with American Medical College of homeopathy, where I am right now teaching as my, my major subject, which is Materia Medica, homeopathic Materia Medica. And immediately, they also offered me to teach a homeopathic repertory because that is my minor. So I didn't major in homeopathic Materia Medica, and minor in homeopathic repertory. So and also, I have more than seven years of experience as a clinical experience. So they also give me the experience clinical classes for their students. So which actually helping me to stay connected with homeopathy and also helping me to promote homeopathy, wherever I go, because I have engagement, half of life in homeopathy. And I will also want to share, I'm sorry, I'm taking a lot of time, but I want to share why I'm why I was inclined to homeopathy. Because I've been raised and grown in the atmosphere of homeopathy, my my mother's side, everybody takes homeopathy, medicines for the, for their optimal health, for complete wellness. And I also had an experience my personal experience, which actually helped me to get inclined toward homeopathy. With my father. My father was admitted it was two in 2008. I was in my school, medical school, I was very young to the medical, homeopathic medicine, because I was learning. So my dad got sick, he, then all of a sudden he fainted. And they took it. My dad, they took it to the ICU. So but before that my dad was suffering from high grade fever. So I, I went to my professor and asked him, What should I give, I gave all the symptoms, everything to my professor, they recommended Jessemiam 20. So I gave it to my dad. So within like two days my dad puked and that's why my mom took my dad to the hospital. And later on the doctor actually told my mom, it is a good sign that your husband puked otherwise he went into him, I went into the diabetic coma. And I think it because of Gempsimuim 30 and Pharaoh four and 6x vital actually helped him to prevent went into diabetic coma. So that was a highlight of me to understand the beauty and efficacy of homeopathy. And currently I'm in Nevada, because my husband is in Air Force. And he used to live here in Las Vegas for six years. And I think, and I firmly believe the the success is because only three states has the license for homeopathy. And I feel the future of homeopathy is very bright in Las Vegas and in particularly Nevada State. And I would be honored if I get a chance to showcase my experience and I will be able to provide my services to the community. So this is how my life turned from a small little girl who just entered the homeopathy school, and now has been in this field for so long. And I'm still trying to learn more and more and more.

B

Bruce Fong DO HMD 39:35

Thank you, Dr. Dhaani. Again, I asked you this earlier, but I'd like to qualify this again. So you've had over 20 years of experience specifically in homeopathy, and also have four years experience. Okay. Okay, since you have more than 10 years of experience in that. So again, the governor's Edik when you guys read it, it's a little vague. It's just saying that they have not knowledge of the this type of medicine, in this case the type medicine, to me a reciprocity has to very specifically be in homeopathic integrative or alternative medicine. In my opinion, Dr. Dhanni actually does qualify, I would love to see my one of my best friends, Dr. Zinni, I can just bring him in on that. But Phil's more than happy to take the test. But again, it has to do with the fact that, you know, Phil, he already told you he is he's just more recently got on board with homeopathy. And He's raising his Android phone.

P

Phillp Zinni DO 40:33

So I'm a little bit more about my background. I'm also the past president of the American Osteopathic Academy of Sports Medicine, and the subject of education and training and fellowship, always came up. So Bruce is spot on. Because if you set a precedent, then people

are going to challenge the board. So you have to be tight with your criteria. So that this way, if someone tries to challenge the board, then you guys will have a precedent that excuse me, a precedent that can not only stand, but something that you could defend in the public court of law. So what Bruce is saying is, is really spot on. The only thing that I don't know, is the year qualification. And again, that's a big nebulous ring and 10 years, if you think about any type of licensing, that's a long time. So I think 10 years, I think would be a good bar to have.

B

Bruce Fong DO HMD 41:50

Yeah, I fell, I really appreciate those comments, I believe that it used to be that you had to be at least 10 years before you could apply to be a nurse practitioner from being an RN. So that's kind of one precedent we can look at as a decade. So again, board members, if we appropriate tonight, through this reciprocity, we can say that the precedent we're setting is 10 years right now, we can always change that later, but the minimum is going to be 10 years, or we can actually lower it or are elevated, but we're saying it's 10 years right now, if that's

D

Dr. Greg Olson 42:22

Let me chime in for just a second, I think 10 years is great. But it's also 10 years, specifically in homeopathy. And she's credential internationally, in India, as a doctor of homeopathy. So it's, it's not like she took a weekend course in Albuquerque, and she wants to become an APH, ah, she has the academic background, she has the 10 years of experience, and saving your dad is always a really good plus, you know, somebody you can take it in an acute, you know, chronic situation, where someone's about to go into diabetic coma and can use a homeopathic remedy to pull them out. I think that's what we want. We want someone who's able to go there and, and really use homeopathy for what its intended, which is its own separate type of medicine. And we want people like Dr. Dhanni, and I might, from what I'm hearing here, you know, I'd love to have 10 more of her coming in just like, you know, with the same experience,

B

Bruce Fong DO HMD 43:28

I agree.

F

Frank Shallenberger MD HMD 43:32

You know, make the comment that it's not so much how long you've been doing it. It's what, what your training is. And for example, if you've just, if you're if your training has been even if you've been doing it for 30 years, your training has been in traditional pharma medicine, you know, that, you know, that doesn't qualify you. On the other hand, if you've graduated from a naturopathic school, or as this applicant is done, if you graduated in a program that deals with this, I think that meets the criteria. I don't know that we need to, at some point, we can discuss this, of course, but I don't need to I don't know that we need to say 10 years, five years, two years, one year. I think, you know, if if we can, if you have if you have if you have a degree, okay, if you have a degree that encompasses the kinds of things that we do in in our, in our homeopathic medical that should be ultimately the criteria.

B**Bruce Fong DO HMD 44:49**

So today, I'm gonna play devil's advocate a little bit. So we have other applicants who have lesser time with have the same kind of training. We've traditionally asked them to take a test. I guess the question before us is where do we not ask a person to take the test? So I think that the year, the years of experience in that specific field may very well be that criteria we're looking for. So it seems like we're putting a decade as sort of our artificial ceiling right now.

D**Dr. Greg Olson 45:16**

But you're also talking about reciprocity versus somebody who is trained here in the United States, you know, is this reciprocity is can we attract people internationally? Who would want to come here and help expand homeopathy? She has reciprocity because she has diplomas, and she has clinical experience. And it's been 10 years, that's a plus. But if somebody was trained at a naturopathic school, and they they did a year internship somewhere, and they've been practicing, are we going to say, yeah, you've got to come take the test, as an APA chair as an HMD. Is it just for international graduates that there's reciprocity?

B**Bruce Fong DO HMD 45:57**

Reciprocity is supposed to be across the board, but you actually bring a point. Now for an HMD that Dr. Dhaani, if you actually had your MD here in the United States, you actually could apply for an HMD the problem was my thought too. So the way that 630 Nevada Revised Statutes 630 A reads is that a homeopathic medical doctor has to be either an MD or DO who graduated from a school accredited school here in the United States or one of the US territories in Mr. Feeley? Please forgive me, I am paraphrasing. So I'm not quoting the exact thing. But the bottom line is that I personally think you're eminently qualified to be in APH. I guess the question before the board again, is where do we draw the line of saying, I'm gonna allow this person to come in without having to take the test? That's the question before us tonight. And again, I hate to belabor this point, but again, we're charting new territory as of the speed doctors any good. Give me any comments you have.

P**Phillp Zinni DO 46:56**

So I can also give you a previous precedent that the American Osteopathic Academy of Sports Medicine had, and that was, in the beginning, before they had a board certification process. They would grandfather people into fellowship with experience, and the experience had to be 10 years. So I don't know what makes 10 years magical or not magical. I have no idea. But there is precedent for that 10 year mark.

B**Bruce Fong DO HMD 47:32**

So I agree. So for whatever reason, I agree with Dr. Zinni. All the years I've been in advocacy groups, legislative advocacy, etc. We've I've noticed a 10 year seems to be some kind of magic number for across the board for every type of healing art that the 10 year mark seems to be

where a lot of people change the rules so to speak.

D Dr. Greg Olson 47:56

Well, can't we take it on a case by case basis as someone who feels like, hey, they've got eight years of experience, and they can show similar training similar credit, then as a board, we can decide, yeah, maybe you don't need the exam, either. Because you've got, you know, the experience that we feel that you need to have, our job is to protect the public. And if someone can convince us that they're capable of doing the job, that's what we're saying, okay, public, we're saying this person is qualified to come see you. And 10 years is a great number. You know, if we make it too high, then all of a sudden we're winnowing out the field of who can come in and work in Nevada.

B Bruce Fong DO HMD 48:32

Well, I mean, at that point, they stopped testing. So come in. That's that's all

D Dr. Greg Olson 48:36

it's still take the test. Right. So

B Bruce Fong DO HMD 48:39

and then Darko said he had another comment.

P Phillip Zinni DO 48:42

Yeah so the the issue respectfully, is when you do things case by case, that's when you No, refer or defer to Mr. Feeley. This is his bailiwick. But I would assume that as soon as you have a moving target, that's what makes your board open to challenges and open to lawsuits. Because one person got in for eight, another person got in for seven, another person got in for nine, because it was a case by case.

F Frank Shallenberger MD HMD 49:12

Ultimately, we'll have to establish some criteria. I don't know that we're going to do that tonight. But we can work on that. Yeah,

B Bruce Fong DO HMD 49:20

I agree. I think that initially, this case by case thing, we have no choice but to do it that way. But I think that sort of a precedence being set is we're seeing about 10 years right now. And now again, that's open to interpretation. I agree with Dr. Olson to say that we have somebody

who's more eminently qualified, the board can make that decision. The bottom line is that we don't have and I agree with Dr. Tom or we don't have to set anything in stone tonight. But the fact is that we all should remember how we're thinking about what our thought processes tonight and how we're going to vote. So any further discussion, just

M

Melvin Nario MD HMD 49:59

for a push for Dr. Dhaani application, and in my experience, just of course, all of us here HMDs. The quality of our practices are now currently mixed up pure homeopathy is something that has been seen, not rarely. And we have been mixing conventional, integrative alternative medicine, the qualities of Dr. Dhaani is very unique. And to bring this purity back into the board, it's something that we definitely need. So, again, I agree, this is something that we have to think about, but pushing for her case for her credentials. This is something that again, that would probably hopefully trickle down, our board and practice group will be off with you again, integrated more a little bit more with our practices.

B

Bruce Fong DO HMD 50:47

And normally, I wouldn't call the question by now but this is a like I said, Well, I want everybody to be able to say their piece tonight. Mr. Feeley? Do you have any comments for us or anything you think might be helpful?

B

Bruce Fong DO HMD 50:58

But no, I don't think so. I think it shows a lot that you there's been a lot of discussion, thoughtful discussion going back and forth on this. If this were to come down to a case by case issue, I think it's very important that this type of discussion specific to her particular qualifications actually happened and would happen in the future. Again, I still, I haven't seen this edict personally, myself. So I guess I can't speak too much on the specifics of how it's going to go. But so far, everything seems an order to me,

Charles Green

let me let me chime in a little bit on that. Because all of that really fell into my desk and my opportunities. So I had to look at 003 and 004. Very, very closely. In fact, we were we were on the line to be sunsetted, according to requirements that the governor had put out. So so I put a 30 page document together saying homeopathic, homeopathy needs this place in the sun. And obviously, we're still here. But the reciprocity issue, is a golden calf for the governor. And that he's, he's he wants Nevada to be a leader in bringing opportunity to the state. And I really applaud him for that. He said that right out of the gate. And so maybe everybody didn't agree with him on that. But But we're here to, he wants to have boards be more open and friendly. Certainly we're regulating a body is certainly all that's important, especially in medicine. But he wants it across the board and professional trades, that leads people into the state to certainly have the qualifications. And I applaud him for that. And I don't think we're going to see a lot of pushback on this. And this woman didn't didn't ask us to do this, she was more than willing to

take the test. But when you've got somebody that's qualified, I want to set a precedent here. Because we want more people like that, that made it their life's challenge, especially in homeopathy. So I applaud this woman in her work in her effort.

B

Bruce Fong DO HMD 53:02

And Dr. Dhaani, just for the record, you would be willing to take the test if we decided to go that way. Okay, that's that's all my here. So we have a question on the floor. Ladies and gentlemen, I don't want to push this issue. But I think we got to move the meeting forward. We have a question that simply do we approve Dr. Dhaani of at least on reciprocity to the to the position of advanced practitioner, homeopathy. So I will, unless there's further discussion, I will call the vote now. All in favor, please signify by saying aye. To

F

Frank Shallenberger MD HMD 53:35

make a motion?

B

Bruce Fong DO HMD 53:36

Okay, good.

F

Frank Shallenberger MD HMD 53:38

I'd like to say that, either one. We establish some criteria right now. And the discussion, it sounds like that criteria may involve an education in homeopathy, and combined with years of experience. And that may be our criteria for right now. But I was thinking it might be a better idea to just delay this thing, until we get together and actually come up with some hard criteria. And I understand we're going to have a meeting in January. So yeah,

Charles Green

we're mandated. We're mandated by law to have a meeting in January. So so we can defer that if you'd like. Yes.

F

Frank Shallenberger MD HMD 54:20

Perhaps we could get this. I think it's an important thing. So I liked this conversation. But maybe we could come through with some some hard criteria by January, and I'm sure it would include Dr. Dhaani.

B

Bruce Fong DO HMD 54:34

So are you saying that we should not approve for tonight? Are you saying you should go ahead

and move take it?

F Frank Shallenberger MD HMD 54:39

I'm saying we either one approver approver tonight based on our criteria that we all agree on a 10 years of experience and the credential in homeopathy or we wait until we come up with some criteria that would include all kinds of other applicants

B Bruce Fong DO HMD 55:00

so Frank easiest thing would be that you want to offer an addendum to the current motion, that the criteria of proper education and homeopathy or integrative medicine for 10 years is included as part of this approval.

F Frank Shallenberger MD HMD 55:16

This particular approval, but not the final criteria that we end up with.

B Bruce Fong DO HMD 55:21

Okay, so we probably shouldn't even add anything to it. We'll just make it a note that we will actually part of our next meeting that will go ahead and just kind of discuss it then. But I think well, I'll just go ahead and call the question straightforward. Then again, all in favor approving Dr. Dhaani based on her education, to not have to take the test specifically and simply by reciprocity be granted in APH, please signify by saying

F Frank Shallenberger MD HMD 55:49

Aye.

G Greg Olson APH 55:49

Aye

K Karen Dickerson 55:49

Aye

M Melvin Nario MD HMD 55:51

Aye

Charles Green

Aye

Bruce Fong DO HMD 55:51

Any opposed? Dr. Dhanni, congratulations. You're our First Person we've ever done this for and I welcome you to our community warmly. You get applauded, guys go. Alright, moving on. Agenda Item number eight, discuss recently approved submitted. Senate Bill 336 to the Nevada State Legislature. Mr. Green, you have much more expertise than I do on that. Please take

Charles Green

this. Yes, yes. And I'm so excited to bring this up again, that we certainly brought it up at the last set of board members. I thought it was important enough to bring it up again tonight. I don't know what you guys know or don't know. But Dr. Royal had written up SB 336. He took it to the Legislative Council Bureau, they made an official amendment. They redrafted it, they accepted it. Dan and myself, went up and testified in front of the Senate and the legislature and for prosecutorial issue on one of our physicians. And that he was using a protocol called IPT. And I'm sure all of you are well aware of IPT. So I don't have to belabor that. But the short of it was they were prosecuting for that. It's it's a it's a modality has been used since 1930. I thought it appropriate that we speak up on that and say that he is a dual licensed physician. So he had the authority to use that, as in his protocol sets. And we got the bill sponsored by Senator James Ochenschall, Inner Inner committee meetings up are our meetings up there, we were able to get a second from Dr. Stone, or excuse me, Senator Stone, and he co sponsored the bill. And then they had the vote and it was unanimous through the legislature Senate, it was unanimous to the legislature and it became law when the governor signed it about two months ago. So now, the essentially the bottom line is the DO board has to play in their sandbox. And if they get a complaint against one of our physicians, using alternative medicine, they have to they have to turn that over to us. Dr. Fuller, who has just recently passed away was he was at he in 1999 was able to get medical doctors similar type of action in that. Essentially, the medical board is supposed to turn over any complaint to us on those types of procedures. So So dual licensing is means something now for both medical doctors and for DO. And so I'm proud to say that SB 336, the governor signed it, it's law, and they have to abide by it. So we were able to achieve that just this summer. Now our legislature doesn't meet until two years talk that I've been around for the two years I've been involved with this board is to get Natureopaths board. They were licensed in 1986. For whatever reason, the setup didn't like the way they were operating their board, the board was closed sunsetted and this is obviously 30 40 years ago. We've talked to the naturopathic board, they're now in 26 states, they wrapping their arms around us to bring legislature into the Legislative Council. The next time they meet to try to get naturopathic license in the state of Nevada. I would also like to talk to you folks and as far as others and I'd like to see if you've got a doctorate in homeopathy. I don't think you need to work under another medical doctor. So I'd like to see serious homeopathic doctors be able to have separate licensing as well. So I'd like to see our boards, licensed DOs, MDS Natureopaths and clinical homeopathic doctors. So if I think that's something that we can work on over the next two years until the legislature meets, and write up some legislative information for that. So I just want to apprise you of what we're able to do. We do have a wise

constituent was Dr. Royal, you know, his father, obviously, with logic folks understand this board, if you've been involved with for four decades, but he brought it about, Dan was very eloquent the way he brought that together. And we went up there and defended homeopathy, you know, my background, you may some of you may know or may not I, we developed the homeopathic product for allergies. And I went from zero to 100,000 bottles, and hence why I got essentially nominated for the board. And then it was my background, I'm a degree in in accounting, took on the position of the secretary treasurer. And I worked hard to straighten out this board as much as I could, based on what I was given. And it was pretty tough battle. But I had the legislative body now satisfied with our accounting, and I got zero accounting from anybody, the past secretary treasurer of the board, so I had to reconstruct all the books, and I put it all into a platform that the LCB now accepts. So our books are now organized and up. And that took me quite a while.

B

Bruce Fong DO HMD 1:01:47

I'm assuming you're we're done with the discussion about the bill and Senate Bill. And number one, I applaud you, Dan roll and everybody else is involved. You've given the board Teeth that we can use in the future. And I want to let everybody know that it sounds like we're now in agenda item 10, for the compensation of Mr. Green for the work he's done. So Charles, please continue.

Charles Green

Okay, so most of you know me, I really take this job seriously. And I've done a lot for the board, in that. It's a 40 year old board. Websites weren't even around back then. So the website is old school, it needs redone. And one of our agenda items I'm looking at is a program from FreshWorks to as a networking application for us. So what I'm looking to do, and quite capable of doing is modernizing our board. So and I want the board to be a shining or the website to be places US physicians can go and get good information on on Homeopathics. So I'm looking to put it you know, and that's what Dr. Glavinovich and myself are working on. With the start of the integrative Medical Foundation, we you guys need information you need you need to make good medical decisions, you need information. And we want to create a with the integrative board a phenomenal library, to all physicians to have access to. So you know, that's something that him and I are working really hard on. We have access, we hope to some funds in Washington, we were we want to bring a some serious money in coffers, to our coffers here so that we can defend this board. This board is in the debts, are in excess of the revenues. And so we need membership. So far we've been able to bring on, we've had a few people leave with a few more people. And we want to continue that but we can't get by on 50 Members, we have to double or even triple that. And I think we can do it with naturopaths. And I think we can do it with Classical Homeopathy. This board is natural medicine, and we are the voice for natural medicine not just for Nevada. For across the country. My goal would be make this board a poster child for that very avenue that people use natural medicines. You know, I've been in the nutritional industry 50 years. And these products work. I've sold them pretty much my entire life. They're they're better than some of the best drugs out there. And they have no associated side effects. Why doesn't Medicaid and Medicare with a solid research we have accepted? And we all know the reason why the drug companies have a thumb on everything we do. I think we can we can rectify that. I'm a member of the National Products Association. There is another association that you guys may or may not be familiar with called the the citizens for

homeopathic choice. A gal named Paula brown founded that organization about five years ago. She's got she's got 1000s of mothers is blowing up the inboxes in Washington DC, on senators on homeopathy. So she's out there single handedly educating a lot of these folks on homeopathy. Now, if you're if you go to the National Institutes of Health, they criticize homeopathics, you go to the FDA, they criticize Homeopathics. And the things that we do, you know, I wouldn't sell 100,000 bottles, your product didn't work.

B

Bruce Fong DO HMD 1:05:24

Sorry, but we got to stay on topic. This is kind of drifting a little bit off topic.

Charles Green

I just obviously, you're seeing my passion. And what else I've tried to accomplish with the board. The problem is funds, we do not have enough funds. So we're looking to bring in more funds. But meantime, I've got to have you know, I've got to have some money to have to work the board and the things that I've done, I can't keep funding the board. So I'm looking for you to Okay, the second to the last meeting, they okay to three months stent for me and I and we put it off for the last five months, six months now. And so I'm do from July to December, in the like the board board's approval on that so that I can continue on with my work.

B

Bruce Fong DO HMD 1:06:11

Charles can give us a notice, please.

Charles Green

Alright, so historically, you know, historically, I, personally, I've got \$45,000 into the board on and that's mostly an employment for my staff. But I don't do that anymore. I've been working on the board. So the fee that I'm paying myself is what's allowed through the NRS, which is \$2,500 a month. So the board would owe me from July, they paid me three months. And then they wrote me from July to December, because we postpone this till now.

B

Bruce Fong DO HMD 1:06:46

So can you give us an update, please Charles.

Charles Green

Alright, so that'd be 2500 a month, times, six months, it would be \$15,000.

B

Bruce Fong DO HMD 1:06:56

Ladies and gentlemen, I also would point out that Charles has actually been doing the work of the executive director. We currently do not have an executive director. That's something we need to think about in the future to take the workload off. Charles. Charles, I love you, but you're killing yourself. We don't need that. I need you there for all the other wonderful things you just talked about. It's time for you to take charge of things. Okay. I would I would point out it's precedent ladies and gentlemen, that we paid an executive director in the past 2000 a month for for the the role that the she would play. The amount that Mr. Green is asking for basically falls close to being online with that. And he's not asking for what he did prior to this. So again, as President, I'm not going to make a pro or con about this. I'm just going to put these thoughts in your head. And I have now to open discussion officially through Robert's Rules. I need a motion to approve reimbursing. Mr. Green, would you say 15,000? Charles? Yes. Okay, for reimbursing Mr. Green \$15,000. And a second that we can open discussion.

F Frank Shallenberger MD HMD 1:08:13

One point I want to make, it seems like we skipped over the conversation and discussion about the recent legislation about one board interfering with the work of another board. We just skip over that.

B Bruce Fong DO HMD 1:08:29

Charles kind of actually talked about it, and then he kind of just meld it into this issue. So that's when I interrupted him the first time. The long story short is thanks to his Charles and Dr. Dan Royals work, the the ability of one board to say that, hey, I have jurisdiction over somebody who's duly licensed versus another board has not been quashed, we have precedent, we actually have a law in place that says that. No one board can claim jurisdiction over the other until both have done their jurisprudence. So that

F Frank Shallenberger MD HMD 1:09:01

I understand that Bruce. But here's the deal. The medical board completely just thumbs, flips, flips us off on that. They pay no attention to that at all. So I'm going to make a motion that our legal counsel sends a letter to the medical board and informs them that need to obey the law, because I'm sick and tired of these guys acting as though they're king of the world.

B Bruce Fong DO HMD 1:09:28

I have a motion on the floor regarding the previous agenda item which was regarding that Senate bill that we have our legal counsel, I guess you Mr. Feeley started dropping in this to draft the letter basically asserting our rights. We won't say thumb our noses we'll see asserting that are equal jurisprudence over duly licensed individuals. Do I have a second for this?

G Greg Olson APH 1:09:55

I second.

B Bruce Fong DO HMD 1:09:57
Second. Any discussions? I think

D Dr. Greg Olson 1:10:01
We should, if we're gonna send one letter

F Frank Shallenberger MD HMD 1:10:03
We already have there's already something on on the in the law anyway, we're a complaint is made against a homeopathic physician, physician to the medical board. They are to refer by law that complaint to the homeopathic board. They don't it completely ignore it.

B Bruce Fong DO HMD 1:10:27
So I think that an educated letter Mr. Feeley would Yeah, is

B Bruce Fong DO HMD 1:10:31
this something that I could just sit down with somebody to discuss the issue further. I mean, I'm kind of new to this whole controversy between the two boards here. So I'd rather kind of get my head around the issue before I

B Bruce Fong DO HMD 1:10:42
well, what we can do, what we can do is we'll have a directive from the board, and then we'll give time for you to meet with members of boards to kind of flesh this out properly. I think the wording needs to be a little more diplomatic. But I think that we can definitely get the point across is please don't tread on us again.

C Carrie 1:11:01
Yeah, I'd be happy to work with you, Mr. Feely, and talk to you a little bit about that. I also have some legal counsel that I've been talking to about this. Although

B Bruce Fong DO HMD 1:11:09
Technically, I still need a second for this motion. So we can just say,

 Greg Olson APH 1:11:12
Second.

Okay, thank you. To Frank. And Matt, would you guys say go ahead and exchanged numbers at some point here or, Mr. Green, you have everybody's contact, which I do.

Charles Green

I provide it to anybody that wants it. Okay.

 Greg Olson APH 1:11:27

We have a motion on the floor. I'm sorry. I'm going to try to move this meeting forward as President I try to keep these things a little shorter. So that we have motion to Florida have Mr. Feeley based on the recent law that was put in place about dual licensees having equal jurisprudence with the boards to write a letter of education to reform the other licensing boards that the homeopathic board does also have jurisprudence over the political situation? So all in favor of that, please signify by saying aye.

 Melvin Nario MD HMD 1:11:59
Aye

 Bruce Fong DO HMD 1:12:01

I'm pretty sure Dr. Olson was gonna say aye. Because he did step away. He was seconded it so I'm sick. And I need a post hearing done, even if Dr. Olson was against that he'd be the minority with this passes. Dr. Shallenberger, thank you for taking this on. And Matt, thanks for being the newbie jumping into this. And we'll get this done. All right. I need a motion for the next item, which is reimbursement and Mr. Green for again, Charles, we really appreciate everything you've done you you've kind of kept the board going in a really difficult time. You've spent two years of your time putting everything back in place. Again, I remind the board members that we previously paid an executive director to do what Charles does, for 2000 a month and Charles has done more than that. But again, I leave this up to you. I need a motion on the floor to approve Mr. Green's request for reimbursement.

 Melvin Nario MD HMD 1:12:01
Aye

 Karen Dickerson 1:12:01
Aye

 Frank Shallenberger MD HMD 1:12:01
Aye

 Dr. Greg Olson 1:12:58
I make a motion that we reimburse Charles Green \$2,500 per month for the last six months work totally \$15,000.

 Bruce Fong DO HMD 1:13:07
Do I have a second?

 Frank Shallenberger MD HMD 1:13:08
My second that.

 Bruce Fong DO HMD 1:13:10
Shall we have any discussion? Once or twice. All in favor of reimbursing? Mr. Green \$15,000, please signify by saying aye. Aye. All opposed. Mr. Green? your reimbursed?

 Charles Green
Good.

 Charles Green
All right now,

 Bruce Fong DO HMD 1:13:39
was there an item nine,

 Bruce Fong DO HMD 1:13:42
though it's supposed to be? Okav. Item nine was the Senate bill. It the Senate Bill was

reimbursement for Mr. Green. And then we actually have an item 11. It's, well, technically it's, I guess 10 and a half, it wasn't numbered properly. But ladies and gentlemen, how do we pay for all this? Well, here's how we're gonna do it. The homeopathic Board needs the increase it's Fee's. You guys all know that. We've been working. I've been on this board forever. And we have never been in the black. We're always in the red. And when I had a secretary, when I had an executive director, we were we were burning that up real good. And honestly, even when I didn't have an executive director, we were still bringing it up really good. So I hate to do this, but based on SB 98, which is what reformed the the homeopathy board in the first place, we are allowed to make fee increases. And I believe Mr. Green has that on the agenda in front of you know,

Charles Green

Bruce, I outlined it in you the fees are allowed to go up to \$2,000 for HMDs. Obviously, I think I don't want to lose people by saying a \$2,000 fee. He saw an increase from six to eight I think is more appropriate. And then as we move forward, it'll get on more members, we can talk about lowering the price. But the board needs money to operate, you know, in the money's not there. As the accountant, I will do everything in my power to wash your expenses. You know me I add a couple of things my first hour on the job in the car in Reno, at our office. I was there 15 minutes, and I caught \$15,000 worth of embezzled. I don't know if you all knew, I think most of you knew that, right. But I was able to get the bank to stop the embezzlement and we and Sean and I went to the bank and open up a new account. So there's 15,000 Right there. So I'm getting off track here a little bit. But you know, I think these are reasonable increases from from 6 to 8 and 4 to 6 and two to four.

Bruce Fong DO HMD 1:15:57

You either me or you please formally read that into the record what your your increases want to be for each. Okay.

Charles Green

Very good, sir. Okay, so implementation of Senate Bill 98. For new candidate application fees, the Nevada Revised Statutes 630A 30.330, Section five, this bill increased those fees, and specific separate maximum renewal fees for physicians, advanced practitioners of homeopathy and homeopathic assistance. From HMDs, from 600, to 800, APH's, from 400 to 600, and Ha's from 200 to 400. And so this is in front of us for consideration and discussion. And a means of generating additional revenue for adequate amounts for the administration of the of the board for proper service of licensing and certificate holders.

Bruce Fong DO HMD 1:16:55

Whether you have everybody I know the board raise fees a few years ago, that was also necessary. Again, understand the board has the right under Senate Bill 98 from several legislative sessions ago to raise the fees even higher, we're trying to not overdo it. But we need

enough capital to run this board. And we don't have it right now. So first, again, according to Robert's Rules, I need a motion to approve the fee increases to say like that, let's keep it simple.

F Frank Shallenberger MD HMD 1:17:23

I make a motion that we increase the fees for HMDs to 2000 bucks a year. And for HGH is 1000 bucks a year. And we leave the homeopathic assistants where they are.

B Bruce Fong DO HMD 1:17:40

So we have emotional Floor, actually, it's going to be different than the suggestion that was already put forward that we increase the fees to 2000 for the HMDs. And somebody needs to write this down. And then a APH said that 1000

F Frank Shallenberger MD HMD 1:17:55

Yeah. 1000 APH

B Bruce Fong DO HMD 1:17:57

is and leave the HAs at 200. That's right. Okay, Mr. Feeley? I can do this right.

B Bruce Fong DO HMD 1:18:05

Yes, if you've made the motion, let me?

B Bruce Fong DO HMD 1:18:09

All right, and now I need a second, then we can start discussions. Do we have a second for this motion? If we do not have a second emotion will die.

F Frank Shallenberger MD HMD 1:18:22

I did some. I did some number crunching on this. And if we did that, I think it's pretty reasonable. It would save us a lot. It would put us in a good position. financially.

B Bruce Fong DO HMD 1:18:38

Let me just put a pause button on that. Dr. Dhaani Dr. Zinni. I'm sorry, I forgot, you guys are free to take off right now. You guys have you're more than welcome to stay, but you're not required to stay. Okay. I noticed you guys sitting there and might be getting bored. So thank

you guys very much. And I appreciate you both. And I thank you for that as well. All right, back to topic. We do need a second for this motion, otherwise, it will die. Otherwise give me another motion.

D

Dr. Greg Olson 1:19:10

I'm getting concerned that some of the APH's that are just basically just getting by if you increase their fees, they may just drop out altogether. And Frank's right, we don't have any money the engine isn't going anywhere. But if we lose half of our APH is because of the big jump that shoots us in the foot anyway. So I'm just I'm concerned that that there's some APH that might have a problem jumping up to \$1,000 a year.

B

Bruce Fong DO HMD 1:19:39

Mr. Green, you're the numbers on this.

Charles Green

Yeah, I gotta get my increase the fees

Charles Green

I tell you what it Frank's right about right. We have certainly had the ability to do this. My fear is that it would be a little harder to bring people into the quorum, you know in my job besides being Secretary The Treasurer is to get applicants in here. And, you know, if we're if we're twice as I mean, what let's compare ourselves just for a second before we go to vote on this, let's compare ourselves to you guys are medical doctors and your DO's as well. What are those fees? Yeah, they have 5000 doctors, I understand that. But But I don't want to, you know, we can certainly do this. I don't want to scare people off in the natural medicine realm. That's my only fear. I think we could we could do it again next year and do it again the year after that, and make it a gradually increase.

B

Bruce Fong DO HMD 1:20:37

He's actually right. We can we can do it again next year, maybe we should consider doing this in a permanent level. That's fine. But again, as chair of the meeting, I have to call again, do I second Dr. Shallenberger motion, or this motion will die. And we'll have to have a new motion. Going once, twice. I'm sorry. Right. This one dies? Do I have a motion for your motion? Motion for discussing your for the various licensures without saying them out? Does anybody have a motion to increase fees?

F

Frank Shallenberger MD HMD 1:21:17

Yeah. Okay. I'll make another a motion, that we're fairly saying. Maybe this one will work.

 Bruce Fong DO HMD 1:21:24

All right. Thank you. We have a motion to increase fees. Do we have a second on that?

 Greg Olson APH 1:21:27

Second?

 Bruce Fong DO HMD 1:21:28

Thank you. Now, let's have a proper discussion. According to Robert's Rules, where do you think we should go with this gentleman? And ladies?

 Frank Shallenberger MD HMD 1:21:38

Well, you know, I come on, you know, this amount of money is nothing. When we look at the work goes on today in the the incomes of us today. 200 bucks a year. You know, for something as important as keeping this board going. I can't imagine that that's going to turn somebody away all the people that are licensed under this board. Pretty much consider this as an important license. Without this without this license. We're at. We're at the mercy of powers that be in for two bucks a year. I don't understand how that's gonna be. Mike,

Charles Green

I gotta agree with Frank. You know, from the standpoint, I tried to be a kinder, gentler, and raising it, you know, maybe year after year. Let's put the baby we go to 1000 for medical doctors.

 Bruce Fong DO HMD 1:22:42

You know, we can we can talk about all this right now. We're legal under 241. And we're legal under Robert's rule, we can make a suggestion at this point, the numbers that were on the agenda, I think we all we can agree. We're suggestions. We're now going to go ahead and try to discuss this as as more of a hard number. So again, I also want you guys to consider how many HMDs do we have? We don't have that many 17 F 17. How many APH's do we have?

Charles Green

We have actually 15 We're going to launch a couple more. So yeah, how many APH is do we have 23.

B

Bruce Fong DO HMD 1:23:20

And then how many HA's do i Seven? Alright, so this is going to primarily come, it's going to affect the APH is based on number. And we've got HMDs and APH's here. So I believe Dr. Shallenberger is right, I think we can hit this harder. Okay. I'm speaking from a guy who's not making that much money right now. But I agree with him. It's an important thing. I'm putting my time I'd say I mean, all these years before this in and now I'm putting my blood sweat and tears into this. I think we all can put a lot of money into it. Okay. That's my feeling. Again, I'm probably willing to pony up a little bit more. And I personally, I personally agree with you, Charles. Maybe like maybe 1000 For each of these. I don't know about you guys. Again, I'm, I'm the chair. I shouldn't be saying much more than that. But I see

Charles Green

Say a 1000, 600 and 400. Just go up because I'll take capital, I need capital to run this thing. You'll never find a better steward than me than your funds. You know, my fiduciary is with this board. I'm a real estate broker as well. I want everything transparent. I want it out front. And everything I do so. But more importantly, I need money to operate this sport. I'm starting a fight. I'm starting a 5013 C so I can give the money board the board money so we have to have Captain we can't this is nowhere near what we're going to need to fight the fight. Frank is absolutely right. I need half a million dollars. I need a million dollars in the coffers. We're not gonna get it with 20

B

Bruce Fong DO HMD 1:24:51

I'm gonna tell you that but HMDs Frank Melvin, talk to me. 1000 Good for you guys.

F

Frank Shallenberger MD HMD 1:25:00

I'm going to grant a year ago for two grants.

B

Bruce Fong DO HMD 1:25:06

Can you? Hey, Charles, Can you unmute Dr. Nario? Please?

Charles Green

Okay.

Charles Green

that I have a mute. You should be unmuted while waiting to hear you. Are you unmuted now? DoctorNario ?

M Melvin Nario MD HMD 1:25:24

Yes. Oh, sorry about that Right. So I share the sentiments of Dr. Frank here. As you can see the powers of the practice, the engines of these practices are the HMDs. So in trying to put up this funding, now, I realize how how this membership, or being part of the board is very important. Now being one in one of the chairs before I was just a spectator. But now I can definitely understand that we do need to get keep this board alive as much as we can. And as funding, that's definitely something that we have to all agree on. I do agree that \$1,000 is pretty reasonable. Just because I know, this is something that we can work for. And money right now is not an issue, but the licenses licenses of our practitioners are more important. So I do agree with that.

B Bruce Fong DO HMD 1:26:18

This is an important issue. So I have other HMDs in the audience here. Dr. Bara, you are on the board with me. How do you feel about this? Yeah,

A Abbira 1:26:27

I thought about it, and we could kind of stay on \$1,000 to have more funding because I do not know kind of where do we get some money now for to defend us in the legislature to come, you know,

B Bruce Fong DO HMD 1:26:47

realize the board? You know, that's that's a separate issue. We have to have legislature in the board. We can't have our own lobbyists. But technically, that's usually outside of that purview. But But understand that the board from the day to day operations, we just don't have enough money right now. But you you wouldn't be 1000 would be a good number.

A Abbira 1:27:05

Yeah, I agree with. Yeah, mainly that you have some fans that have been emergency. We can move, you know.

B Bruce Fong DO HMD 1:27:19

Great. Charles, would you like to meet Dr. Glavnovich? I'd like to hear his opinion. Okay.

Charles Green

I'll do that right now. Dr. G, can you hear us?

J John Glavinich MD HMD 1:27:30

Can you hear me now? Yes, yes. Yeah. Yeah, I think that's one of the reasons why Charles and I have been working on the 501 C three, you know, we feel that we can go to the casinos and a lot of other organizations and get funding because integrative medicine is the future, you know, and we want to promote it as much as possible. I have a lot of people that I've been talking to in other states that want to get a homeopathic license, even though they may not be practicing here. But they I just talked to some people in Dallas today and Dr. cleavers from Dallas, I, I've recruited a whole number of people to come through the pipe here to the pipes to join our board. I

Charles Green

I will testify to that, because I have their applications. I have their application.

C Carrie Porter 1:28:17

Also, I'm I don't know if anybody else is going to the A4M, next month 14th through the 16th next month, but I have a whole bunch of people there that I'm going to be talking to who want to meet Charles want to get an application. And you know, I think we want to really promote this. And, you know, I don't want to scare people away. I know you want to raise the funds. But I think there's also another mechanism that we have with a 501 C three to to help build a membership and help fund things. I know Bruce needs the money paid back. And Charles does too for all the workers.

B Bruce Fong DO HMD 1:28:52

So John, specifically, what do you think about the \$1,000 figure for the attendees?

J John Glavinich MD HMD 1:28:57

I just don't want to scare people off, you know, you got you only have 17, you know, MDS D O's in that position, so it's gonna be a little tough. So,

B Bruce Fong DO HMD 1:29:08

but Okay, so where, where do you think we should take? Should we leave it at 800?

C Carrie Porter 1:29:14

I think yeah, give us a chance to see if we can build it with a 501 C three, you know, we have a mechanism to get it by the end of the year, you know, so and, you know, Charles Arkin problem

B Bruce Fong DO HMD 1:29:27
we have is we have to put our renewals out and putting

 Charles Green
those out next week so so a little a bit you know, that's not all we

B Bruce Fong DO HMD 1:29:36
need to know how much we're gonna charge the doctors and the practitioners in the system.

 Charles Green
I'm with Frank, I need I need capital to run this thing. And

B Bruce Fong DO HMD 1:29:44
so I again, I'm just it John, if you did, I accept the fact that it's going to be difficult, we're gonna probably have to do as increments but I'm just kind of pulling people and get to get like the board members feel more comfortable about moving forward with that figure , hear so well. So specifically, what do you think about the \$1,000? Figure?

J John Glavinich MD HMD 1:30:06
I think it's a little much. I think it might scare people off. And, you know, we'd like to take a good shot and I have people that want to come from out of state that won't even practice here. And for them, that would be kind of steep. You know.

B Bruce Fong DO HMD 1:30:24
I appreciate that. But just because I need to move this along. I always appreciate everything you have to say, John, but but we'll talk more. Dr. Forsyth, these that are early for second we unmute him. Because yes. Okay.

M Melvin Nario MD HMD 1:30:46
Or,

B Bruce Fong DO HMD 1:30:48

if Alice is a doctor first, to Dr.

Charles Green

Forsythe here, he should be able to speak he's he's got he's not on yet. It's

Erlene Forsythe 1:30:56

It's under it's under actually. Erlene Forsythe.

Charles Green

I like to hear Arlene chime in on this what her thoughts are? Yeah.

Erlene Forsythe 1:31:07

So well, we do this is really important out there. We do pay for all of our homeopathic licenses for our staff. So they are not required to pay for the licensures. And I don't know how not to Dr. Forsythe ourselves about increasing the fees, but we are able financially to increase them.

Greg Olson APH 1:31:43

I agree with that. Because I do the same thing. My practice, I pay for all my guys to so

Charles Green

board, we got to figure out ways to you know, I can't tell you how excited I am to have all you wonderful people to communicate with now about getting this board up and running. This is the future John's right. And I'm just on cloud nine, just having all you guys here to to help me see this go forward. I know you all love it. And this is our love our passion. So

Erlene Forsythe 1:32:17

I do I do bring up the former one C 3.0. Because we have a 501 C program at our office. People do find that, yeah, it's easy for us to get people to find you know, cancer care.

Charles Green

Look, we I can tell you right now, we need three or four or 500 members, it's going to take us a few years to get there. We religiously to only meets every two years. I can't even naturopaths all across the country, it'll join, you will be able to fill the coffers in a few years. But we got to

stay afloat till that.

J John Glavinich MD HMD 1:32:55

Yeah, we reached out last year to Lynn wheeling in DC who's the lobbyists for the naturopaths. And they're ready to go, you know, they're going to help us financially. They're going to bring members and they're going to you know, promote it. And, you know, they're going to help us with the legislature. So there's there's a potential for another 50 to 100 naturopaths coming on board. Yeah.

B Bruce Fong DO HMD 1:33:22

Okay, so I'm just gonna kind of keep this on point. Let's we're bouncing that number of 1000 around for the HMDs. APH's is Dr. Olson, how do you feel about the number for 600 versus 800? Where do you want to stand on that one?

D Dr. Greg Olson 1:33:38

I've been mulling that number over to 800 isn't out of line. A lot of the APH's is you remember they're working with other Doc's, they are probably more limited in their scope of practice and what they're doing. I just wouldn't want to scare off anybody who thought Yeah, I'd love to come in and be in APH in Nevada. It's already hard to get a supervising physician to work with you. So but I wouldn't go much more than \$800 I think you start to scare people off. I know we've had three APH is in our office retire in the last year. And then we lost Oxford Royal. So you know, again, there's for people that were buying certificates and licenses every year there aren't going to be doing it anyway. So we want the new blood. We want natureopaths. I think we could even make a case for reaching out into the chiropractic community, for people that want to come and have a bigger scope of practice. I think there are nurse practitioners that haven't even been approached. There are midwives there are a lot of people that I know are using homeopathy, they're just not licensed. And our job as a board is to say, Hey, you can't do that come be with us. And if it's too expensive, they may not want to come join. So I don't have a problem with 800 for APH I don't have a problem with this. 1000 for each MD, I think that number of 400 for an HA, because they're much more limited in what they're doing. I don't think that's out of line.

J John Glavinich MD HMD 1:35:09

One of the things that Charles and I are talking about is that we're gonna go after the MDS, a lot of the MDS want to practice natural medicine, but they're kind of afraid of what the board is going to do to them. But if, like we said, if they get the HMD, then they have more latitude to do things. And there's a lot of MDS who would come over and join our board as well. We just need to do the, you know, the proper recruiting for them.

G Greg Olson APH 1:35:38

Appreciate all that. And like, again, ladies and gentlemen, on the board, we have to we have to

Appreciate all that. And like, again, ladies and gentlemen, on the board, we have to we have to get an answer for Charles tonight. He's got to put out with none of us have been. It's December 1. Tomorrow,

Charles Green

I got bills out guys.

Dr. Greg Olson 1:35:50

I'm gonna so you're gonna close discussion, you want to look for a motion here?

Bruce Fong DO HMD 1:35:54

One more person I want to hear from Can you unmute Carrie Porter, please? Yes, yes, sir.

Melvin Nario MD HMD 1:35:59

So we can increase this and then put it back down. Right.

Bruce Fong DO HMD 1:36:04

Once we voted, we'd have to vote it back in next year is the thing. Yeah, we change it. We just we need to immediately have an answer, because we have to put renewals out like next four hours. Carrie, can you hear me my friend? Yes, I can. Can you give me your opinion? How do you feel as an APA, ah, having to pay possibly up to \$800 for your renewal?

Carrie 1:36:25

A bit turned off? If there's no salary increase, honestly, Doctor Fong

Bruce Fong DO HMD 1:36:29

I hear that. Okay, so we got an opinions on the floor. Again, board members, I need a motion now with numbers.

Dr. Greg Olson 1:36:40

I make a motion that we increase the fees for HMD from 600 to 1000. For a AHS from 400 to 800. From HA's from 200 to \$400.

B Bruce Fong DO HMD 1:36:56
Do I have a second?

F Frank Shallenberger MD HMD 1:36:57
A second it.

B Bruce Fong DO HMD 1:36:59
Okay. Dr. Shallenberger seconds. Any further discussions? Anybody who's present the meeting?
I open the floor to you.

 Charles Green
Alright, so the numbers are 1000, 800, and 400.

B Bruce Fong DO HMD 1:37:09
That is that's what I heard as well.

D Dr. Greg Olson 1:37:14
That's correct. That's the motion.

G Greg Olson APH 1:37:15
Okay. Seeing no further discussion. I will now ask the board to vote on the increase of fees from the HMD to \$1,000. The APH 's to is the 600. And the HA's two 400. correction

D Dr. Greg Olson 1:37:32
that was my motion was for the APH is to go from 400 to 800. And I'm

B Bruce Fong DO HMD 1:37:37
sorry, so HMT is 1000. APH is 800. And the HS two 400. Is that correct?

D Dr. Greg Olson 1:37:46
That's correct That was my motion

That's correct. That was my motion.

B

Bruce Fong DO HMD 1:37:48

All right. And that was seconded. All in favor? Anybody needs to hear it again. Please ask. All in favor of this, please signify by saying aye. Aye. Any opposed? Ladies and gentlemen, we have just passed the fees increase? That's probably unprecedented in the level, but I know it's necessary. Charles, I hereby charge you for getting these renewals out in a timely manner with these new

Charles Green

your way right away.

B

Bruce Fong DO HMD 1:38:18

Thank you, sir.

E

Erlene Forsythe 1:38:19

Did we get a license?

B

Bruce Fong DO HMD 1:38:22

Yeah, I believe your screen is printing the previous licenses up as well.

Charles Green

Well, those are done. I in fact, the minute you pay, it'll queue out that day. The licenses are done. I have to do the permanent for new applicant license, or, but the renewals are all printed up and we've worked with Dr. Fong on that. And we put everything that we thought was proper in there, either printed there in my office, they're going out

E

Erlene Forsythe 1:38:54

this week, next week, sorry. We're gonna be going out the minute you pay your fee. No, I'm talking about I paid my fee for this Year.

B

Bruce Fong DO HMD 1:39:03

We're talking about the old ones. 24. Did you have the we're talking about possibly printing up the licenses certificates for the last two years and then we weren't we didn't have hard copies for the licenses and practitioners as well. Or certificate holders as well. We can we can

for the licensees and practitioners as well. Or certificate holders as well. We can we can probably go back and take care of that. But all you got to do is change the year on that thing. We print the same certificate a couple times. That makes sense. Just

Charles Green

do what no certificates I have her for 2024 that's gonna

Bruce Fong DO HMD 1:39:34

write but I think a lot of people were asking for their previous ones they never got hard copies for for the last job.

Charles Green

No, they didn't. I didn't have anything to you know. If I'll have to I can rekindle some somehow if you'd like

Bruce Fong DO HMD 1:39:47

I would just say anybody who you know paid, just just change the date on the on the certificate and print that one for them as well. I just think we will we owe it to all of our licensees and certificate holders are

Charles Green

the ones To ask I'll just crossed out 2023 or 24, but 23 on there and then get them at 2024 as well.

Bruce Fong DO HMD 1:40:05

Yeah, that's what I'm saying. So, everybody within you, we're here to please. We're here to serve this make this board.

Charles Green

Oh, absolutely.

Bruce Fong DO HMD 1:40:13

We are here to make everybody come together in one place. That's my job as President. I'm trying to keep us all together. So, everybody, I appreciate all your efforts tonight. Thank you for

as a new board, you took on some pretty hard tests tonight, I'm gonna tell you that uncharted territory for licensure and fees increase, you guys kick ass. I'm going to tell you that straight up. And there's reciprocity and reciprocity. I appreciate all you guys. The only agenda item left is Well, there's two, but I will entertain ideas for the next meeting. I'm going to suggest one to you, Mr. Mr. Green, is that we need to review our CME policy. Okay. It was very confused the last two years, the Board's policy.

Charles Green

We we got to start forming some committees for these types of things. Historically, before members, I couldn't form committees that are that we were on hold for two years. I mean,

Bruce Fong DO HMD 1:41:10

we can't have the President's business on the next meeting so easily now,

Charles Green

because I have a full board to do things with you. Now.

Bruce Fong DO HMD 1:41:16

Well we'll create committees at the next meeting. Let's put that on the agenda. It's January,

Charles Green

It's January there'll be you know, I'm here to serve you guys. Wait a minute, you all can give me ideas for agenda items to the things that you want to get done, or get them on the agenda. Let's get to work.

Bruce Fong DO HMD 1:41:31

We'll get it done. Anyway, any other anybody else have any suggestions? Or you can always give it to Charles later?

Frank Shallenberger MD HMD 1:41:37

I'll connect up with you, Charles. I'm just saying you, everybody to at least I haven't.

Charles Green

I haven't question for legal Matthew. I don't want to violate laws. I'm a very by the book guy. I

don't want to violate Open Meeting Law. When I had four members, I was scared to communicate with anybody. So how can I get information without violating Open Meeting Law? To my No, I'm not off. Am

F Frank Shallenberger MD HMD 1:42:06
I on? You're on?

Yeah, you're on?

C Carrie 1:42:09
I just was wondering if you're fees?

E Erlene Forsythe 1:42:15
well its already past

B Bruce Fong DO HMD 1:42:17
Charles, I can answer that you just don't talk to more than two people. As long as there's not a quorum that you're talking to. And now as long as you don't make decisions, outside decision, you're not violating Charles, you can mute them if you need to. Okay.

F Frank Shallenberger MD HMD 1:42:36
I got I got a couple of ideas I'd like to put out and just for agenda for next time for people to think about. One of them is I'd like to see us establish some reciprocation for MDS. The other thing is, I'd like to make APH's independent.

G Greg Olson APH 1:42:56
Absolutely. Hallelujah

B Bruce Fong DO HMD 1:42:58
Yeah, we don't need to cover on the agenda to talk about. Yeah, we can't discuss these tonight's guys, because technically, we're going to violate 241. Just throw ideas at Charles, I would suggest you guys you guys all know how to get all Charles. He's that irritating email that

keeps coming in. Sorry, Charles, I love you. But the point is that, make sure you fire something to Charles. And we'll we'll go from there. So with that being said,

Charles Green

let me just add one thing. I have an assistant, Dr. Mary Phillips, she's working hard here to to help me get things done. And we pay her a nominal amount of money to help us and she's been absolutely wonderful. And helping me get things out. So please welcome Dr. Phillips into our fold to help us further the board.

Melvin Nario MD HMD 1:43:46

Hello.

Frank Shallenberger MD HMD 1:43:48

Welcome. Good to have you.

Bruce Fong DO HMD 1:43:51

So the one thing we got to do is I'm sorry, there's one more thing. We only have one more member of the public present. Carrie, do you have any comments for public comment at the end? You have them you have Charles

Charles Green

looking for her now and she was the only one that doesn't have a picture. There us guys got it. Not here. She's unmuted when she's on mute on her end.

Bruce Fong DO HMD 1:44:17

Yeah. Gary goodnight, Carrie economic mute if you're there and I suppose that the way so we'll say no, no.

Bruce Fong DO HMD 1:44:30

She probably does have comments what's happening. So the bottom line is I all I need is a motion for adjournment. And we will take it from there. Anybody want to close our meeting, but most of the motion

Dr. Greg Olson 1:44:42

That we adjourn until our next mandated meeting January

B Bruce Fong DO HMD 1:44:48
Second by Dr. Shallenberger.

B Bruce Fong DO HMD 1:44:50
All in favor say aye.

G Greg Olson APH 1:44:51
Aye

F Frank Shallenberger MD HMD 1:44:51
Aye

M Melvin Nario MD HMD 1:44:51
Aye

K Karen Dickerson 1:44:51
Aye

G Greg Olson APH 1:44:53
Again, guys, thank you so much. That was not a fun or easy meeting. So again, I was serious. You guys kick butt. I appreciate you You all so look forward to seeing you all very soon again. Okay, thanks. Good. Mr. Feeling?

B Bruce Fong DO HMD 1:45:05
Yes, I take care.

B Bruce Fong DO HMD 1:45:08
Can you? You have a pin? I do. My let me give you my phone number. I'd like to just spend some time with you. Sure. And just go and text me and I'll text you back. It's 775-233-8828

Charles Green

Write this down everybody this is your president

B

Bruce Fong DO HMD 1:45:31

doesn't have a good write it down. Again. That's 775-233-8828 and text me tomorrow, man. I'd love to just kind of sit and talk to you. I can kind of get you up to speed on the board a bit more, or

B

Bruce Fong DO HMD 1:45:43

sounds sounds good to me. All right. Thanks,

B

Bruce Fong DO HMD 1:45:45

my friend. All right, guys. I guess unless there's anything I love you. Good night. And everybody and I promise this president I'm gonna try to keep the meetings to about an hour if we can't thank you. Thanks. Good night off. Good night.
